

GoldRiver Orchards

Grades & Standards Schedule

Shelling Stock Schedule

Color - All lots received as Shelling Stock will be assigned a payment class based on their overall color. The five classes are as follows, listed from highest value to lowest:

Chandler Light
Domestic Light
Combination Grade
Low Yield Combination Grade
Culls / Offgrade

The great majority of GoldRiver deliveries typically fall into one of the top three payment classes. Color is normally influenced by such factors as variety, cultural practices, and in-season weather. Specific information regarding minimum percentages of light, light amber, amber, etc. that a lot must achieve in order to obtain a specific color payment class will be gladly shared upon request.

Edible Yield - All lots received into Shelling Stock will be paid based on its edible yield percentage multiplied by its color payment class multiple. The higher the yield, the higher the resulting payment.

Serious Defects -	0-1%	Bonus \$.02
	2-5%	No deduction
	6%	Deduct \$.02
	7%	Deduct \$.04
	8%	Deduct \$.06
	9%	Deduct \$.08
	10%	Deduct \$.10

Note:

Serious Defects include Mold, Rancidity, Insect Damage, Shriveling (counted as one-half of all other defects), and Moisture Damage.

Foreign Material - Lots received which contain excessively high levels of rocks, sticks, or other foreign material will receive a foreign material handling charge of \$250.

Small Lot Deduction - Growers delivering less than 10,000 lbs. in aggregate during any one season will be assessed a 5¢/lb. small lot handling fee.

Right of Refusal -

GoldRiver Orchards reserves the right to reject any load which is deemed to have excessive defect levels, excessive live insect infestation, excessive moisture, or other perceived defect. Grower will be notified immediately.
